#### ABSTRACT:

A <u>pipelined</u> divider with a small lookup <u>table</u> is disclosed. The <u>pipelined</u> divider can greatly reduce the size of a lookup <u>table</u> with a low cost to overcome the problems involved in the conventional <u>pipelined</u> divider requiring a large lookup <u>table</u> due to its iterative operation type. The <u>pipelined</u> divider has a delay time of 3 cycles in a single precision, and can reduce a chip size by about 1/3 in comparison to the existing pipelined divider.
